

Supervisor's opinion on the doctoral thesis

In Zlin on January 08, 2018

Mr. Haojie FEI, M.Sc. began his Ph.D. studies of the Technology of Macromolecular Compounds course of the Chemistry and Materials Technology study programme at the Polymer Centre of the Faculty of Technology at Tomas Bata University in Zlin under my supervision back in 2014. The thesis entitled „**Fabrication of flexible supercapacitors with high electrochemical performance**“ corresponds with his main research focus.

During his doctoral studies, Mr. Fei proved to have mastered broad knowledge of problems related to high electrochemical performance of flexible materials and gel electrolytes. During his studies, Mr. Fei proved himself to be a self-directed and persevering workman with a good scientific potential and high level of creativity.

Based on my personal experience and consultant's opinion it can be assumed that Mr. Haojie Fei has reached sufficient level of knowledge and shown good diligence necessary for successful fulfilment of the Ph.D. degree programme and it is my pleasure to fully recommend him for the defence of this thesis.
